EDUCATION

University of California, San Diego
Bachelor of Science in Computer Engineering

Sept. 2024 – June 2027
GPA: 3.92/4.0

- Competitive Programming Club, NSF REU Fellow (National Science Foundation), UC Scholars Research Fellow

WORK EXPERIENCE

Adobe
Incoming Software Engineering Intern

San Jose, CA
June 2026 – Sept. 2026

VALT Health
Founding Software Engineer

Remote
Aug. 2025 – Feb. 2026

- Engineered a Python Flask backend to unify **100k+** datapoints from 20+ distinct sources, replacing manual data wrangling with automated ingestion pipelines.
- Implemented asynchronous batch processing workflows in GCP, automating data storage and yielding a **35%** increase in execution speed.

Decklar (formerly Roambee)
Software Engineering Intern

Sunnyvale, CA
June 2024 – Aug. 2024

- Developed real-time shipment monitoring modules, optimizing Python and NumPy data processing pipelines to achieve a **15%** capacity boost for **1M+** weekly events.
- Automated data cleaning and analytics for internal dashboards, resulting in **20%** faster reporting speeds and eliminating manual data integrity checks.

RESEARCH

Data Science Teaching & Learning Lab
Undergraduate Researcher

San Diego, CA
Sept. 2024 – Present

WISE Jupyter AI Tutor | *Python, Agents, OpenAI API, Automation*

- Architected a multi-agent AI tutoring framework using Python to automate real-time academic support, implementing prompt design patterns to ensure **95%+** accuracy.
- Developed high-throughput agentic workflows to rapidly process high-density Jupyter Notebooks, automatically synthesizing **100+** computational cells and datasets of **100k+** **points** to extract insights.

ChatSight | *Python, FastAPI, Gemini API, No-Code Workflows*

- Developed an internal tool for instructors to analyze student AI usage, wiring together an **LLM-augmented workflow** with the **Gemini API** to automate the labeling of **16k+** data points.
- Reduced manual labeling time by **90%** through iterative, user-centric UI/UX refinements, optimizing the interface for ease of use by non-technical stakeholders.

PROJECTS

Watchdog | *Python, Gemini API, Browser-Use, Agents, Asyncio* 

April 2026

- Engineered an agentic browser safeguard using the **browser-use SDK** and **Gemini Vision** to autonomously monitor tabs and automate interventions via GUI control.
- Wired together a concurrent CLI with **Asyncio** and the **Notion API** to synchronize tasks, replacing manual context-switching with an automated workflow.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL, C/C++, Java, Bash, HTML/CSS

AI & Automation: Agents, LLMs, Gemini/OpenAI APIs, browser-use, Prompt Design, Zapier/Make (Familiar), Workflow Automation

Development & Tools: React, Django, FastAPI, Node.js, Asyncio, REST APIs, AWS, GCP, Docker
