EDUCATION

University of California, San Diego
Bachelor of Science in Computer Engineering

Sept. 2024 – June 2028
GPA: 3.9/4.0

WORK EXPERIENCE

Adobe

Software Engineering Intern

San Jose, CA

June 2026 – Sept. 2026

- Profiled **60.6M+** production payment events in Databricks, surfacing **86,387** duplicate records and a **47%** null rate to establish the correct source-of-truth for downstream monitoring.
- Designed a time-series anomaly detector, benchmarking statistical algorithms to select an ML model handling multi-layer seasonality across **10+** workflows and **30+** countries.
- Shipped SQL and MLOps pipelines automating weekly retraining and hourly model inference.

VALT Health

Founding Software Engineer

Remote

Aug. 2025 – Feb. 2026

- Engineered a Flask backend serving **100k+** datapoints from fitness devices, designing database schemas to unify data formats across **20+** distinct sources.
- Implemented asynchronous batch processing and storage workflows in GCP, yielding a **35%** execution speedup and a **60%** reduction in redundant database writes.
- Automated environment setup and data seeding via Bash scripts, cutting testing time up to **80%**.

Decklar (formerly Roambee)

Software Engineering Intern

Sunnyvale, CA

June 2024 – Aug. 2024

- Developed real-time shipment monitoring modules for **Amazon, Coca-Cola, and Samsung**, optimizing Python/NumPy pipelines for a **15%** capacity boost on **1M+** weekly events.
- Implemented advanced data structures for visualization and analytics modules, driving **20%** faster reporting and improved data integrity across shipment dashboards.
- Enhanced workflow efficiency **15%** through Panels-based UI/UX refinements and user testing.

RESEARCH

Applications of Multi-Agent Systems

Undergraduate Research Fellow (UC Scholars)

San Diego, CA

June 2025 – Aug. 2025

Multi-agent AI Chess Tutor | *Django, React, TypeScript, SQLite, Gemini API*

- Built a full-stack AI analysis tool with **Django (Python)**, **React (TypeScript)**, and **SQLite**, developing **7 REST API endpoints** validated by **15+** chess players and coaches.
- Architected multi-agent workflows cutting hallucinations **80%** with an **83% faster** runtime.
- Published and presented the AI research at the **UCSD Summer Research Conference**, integrating custom **MCP** servers to standardize tool access across agents.

PROJECTS

SquaredUpChess | *React, TypeScript, Django, WebSockets, AWS, Docker* 

Aug. 2025 – Dec. 2025

- Engineered a full-stack platform on **AWS** for coach–student scheduling and payment processing, architecting **20+ Django REST endpoints** for secure auth and session logic.
- Built a responsive **React** UI with WebSocket state management for low-latency updates, backed by a **CI/CD pipeline** with automated testing ensuring **99.9%** deployment reliability.

Watchdog | *Python, Gemini API, Browser-Use, Asyncio, SQLite* 

April 2026

- Engineered an agentic browser safeguard with the **browser-use SDK**, **Gemini Vision**, and a concurrent **Asyncio** CLI to monitor tabs and sync tasks via the **Notion API**.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, SQL (Postgres/SQLite), Bash, HTML/CSS

Development: React, Node.js, Django, FastAPI, Flask, Asyncio, WebSockets, REST APIs, JUnit, PyTest

AI & Cloud: PyTorch, TensorFlow, AWS, GCP, Docker, GitHub Actions, Gemini/OpenAI API, MCP, Linux
