EDUCATION

University of California, San Diego
Bachelor of Science in Computer Engineering

Sept. 2024 – June 2028
GPA: 3.9/4.0

WORK EXPERIENCE

Adobe

Software Engineering Intern

San Jose, CA

June 2026 – Sept. 2026

- Profiled **60.6M+** payment events in Databricks, debugging data-integrity gaps to isolate **86,387** duplicate records and a **47%** null rate and establish the source of truth for payment monitoring.
- Designed a time-series anomaly detector across **14** payment KPIs and **30+** countries, benchmarking statistical and ML models to cut false alarms **70%** versus the payments team's baseline.
- Optimized the back-end detection pipeline for performance, cutting runtime **68%** (22 min → 7 min) via an MLOps workflow scheduling weekly retraining and hourly inference.

VALT Health

Founding Software Engineer

Remote

Aug. 2025 – Feb. 2026

- Engineered a scalable **Flask** back-end processing **100k+** datapoints from 20+ device sources, optimizing database schemas into one maintainable model with strong data integrity.
- Implemented asynchronous batch processing and storage workflows in **GCP**, raising execution speed **35%** and cutting redundant database write operations **60%**.
- Automated environment setup and data seeding via Bash scripts, and authored specs and documentation standards that cut onboarding and testing time up to **80%**.

RESEARCH

Applications of Multi-Agent Systems

Undergraduate Research Fellow (UC Scholars)

San Diego, CA

June 2025 – Aug. 2025

Multi-Agent AI Tutor | *Python, React, TypeScript, Django, MCP*

- Shipped a full-stack agentic AI tutor with a **React (TypeScript)** front-end and **Django (Python)** back-end via Agile sprints, cutting LLM hallucinations **80%**.
- Engineered custom **MCP** servers standardizing tool access across agents and **7 REST APIs**, delivering production prototypes validated by **15+** chess players and coaches.
- Accelerated system runtime **83%** through agent orchestration and code reviews, presenting the published work at the **UCSD Summer Research Conference (SRP)**.

PROJECTS

SquaredUpChess | *React, TypeScript, Django, Node.js, AWS, Docker* 

Aug. 2025 – Dec. 2025

- Shipped a full-stack platform on **AWS** with a **React** front-end and **20+ Django REST APIs** powering scheduling, real-time lesson tracking, and payment processing.
- Established a **CI/CD pipeline** with strategic **SQLite** indexing, automated testing, and error logging to sustain **99.9%** deployment reliability at multi-user scale.

MovieRecapinator | *Java, Spring Boot, Maven, JavaScript, IMDb API* 

April 2025

- Developed a recommendation engine in **Java** with **Spring Boot** and **Maven**, processing **700,000+** IMDb API entries to rank high-priority episodes for series recaps.
- Collaborated with a 4-person team at **DataHacks** to architect the full-stack system, delivering a functional MVP in Java and JavaScript within a **24-hour** sprint.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C/C++, SQL (Postgres/SQLite), Bash, HTML/CSS

Development: React, Node.js, Django, Spring Boot, Flask, FastAPI, REST APIs, Git, JUnit, PyTest

AI & Cloud: AWS, GCP, Docker, GitHub Actions, PyTorch, LLMs, Gemini/OpenAI API, MCP, Linux
