

ACHINTYA RAI

925-202-1555 | achintyaraism@gmail.com | linkedin.com/in/achintya-rai | github.com/Azurinine

EDUCATION

University of California, San Diego
Bachelor of Science in Computer Engineering

Sept. 2024 – June 2028
GPA: 3.9/4.0

WORK EXPERIENCE

Adobe
Software Engineering Intern

San Jose, CA
June 2026 – Sept. 2026

- Profiled **60.6M+** payment events in Databricks, isolating **86,387** duplicate records and a **47%** timestamp null rate to establish the correct source of truth for downstream monitoring.
- Designed a time-series anomaly detector, benchmarking statistical and ML models across **14** KPIs and **30+** countries to cut false alarms **70%** versus the team's rolling-average baseline.
- Optimized the end-to-end anomaly detection pipeline, cutting runtime **68%** (22 min → 7 min) via an MLOps workflow scheduling weekly retraining and hourly inference.

VALT Health
Founding Software Engineer

Remote
Aug. 2025 – Feb. 2026

- Engineered a full-stack **Flask** backend processing **100k+** datapoints from 20+ fitness-device sources (Fitbit, Apple Watch), unifying schemas into one queryable data model.
- Implemented asynchronous batch processing and storage workflows in **GCP**, raising execution speed **35%** and cutting redundant database write operations **60%**.
- Automated local environment setup and data seeding via Bash scripts, and authored specs and documentation standards that cut onboarding and testing time up to **80%**.

RESEARCH

Applications of Multi-Agent Systems
Undergraduate Research Fellow (UC Scholars)

San Diego, CA
June 2025 – Aug. 2025

Multi-Agent AI Tutor | *Python, React, TypeScript, Django, MCP*

- Shipped a full-stack agentic AI tutor with **Django (Python)** and **React (TypeScript)**, architecting multi-agent workflows that reduced LLM hallucinations **80%**.
- Engineered custom **MCP** servers standardizing tool access across agents and **7 REST API endpoints**, delivering production prototypes validated by **15+** chess players and coaches.
- Accelerated system runtime **83%** through agent orchestration and Agile sprints, presenting the published work at the **UCSD Summer Research Conference (SRP)**.

PROJECTS

Watchdog | *Python, Gemini API, Browser-Use, Asyncio, SQLite* 

April 2026

- Engineered an agentic browser safeguard with the **browser-use SDK** and **Gemini Vision** to autonomously monitor open tabs and intervene on unproductive sites.
- Built a concurrent **Asyncio** CLI for real-time URL blacklisting and **Notion API** task synchronization, backed by non-blocking **aiosqlite** state persistence.

SquaredUpChess | *React, TypeScript, Django, WebSockets, AWS, Docker* 

Aug. 2025 – Dec. 2025

- Shipped a full-stack platform on **AWS** with a **React (TypeScript)** UI and **20+ Django REST endpoints** for coach-student scheduling, real-time tracking, and payments.
- Established a **CI/CD pipeline** with strategic **SQLite** indexing, automated testing, and error logging to sustain **99.9%** deployment reliability at multi-user scale.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL (Postgres/SQLite), C/C++, Java, Bash, HTML/CSS

Development: React, Node.js, Django, FastAPI, Flask, Asyncio, WebSockets, REST APIs, PyTest

AI & Cloud: LLMs, Agentic Systems, PyTorch, Gemini/OpenAI API, MCP, AWS, GCP, Docker, Linux
