

ACHINTYA RAI

925-202-1555 | achintyaraism@gmail.com | linkedin.com/in/achintya-rai | github.com/Azurinine

EDUCATION

University of California, San Diego
Bachelor of Science in Computer Engineering

Sept. 2024 – June 2028
GPA: 3.9/4.0

WORK EXPERIENCE

Adobe
Software Engineering Intern

San Jose, CA
June 2026 – Sept. 2026

- Profiled **60.6M+** events in Databricks with Python, isolating **86,387** duplicate records and a **47%** null rate to establish the correct data source for downstream monitoring.
- Designed a time-series anomaly detector, benchmarking statistical and ML models across **14** KPIs and **30+** countries to cut false alarms **70%** versus the team's rolling-average baseline.
- Optimized the back-end pipeline and deployed an MLOps workflow scheduling weekly retraining and hourly inference across all forecasting models, cutting runtime **68%** (22 min → 7 min).

VALT Health
Founding Software Engineer

Remote
Aug. 2025 – Feb. 2026

- Engineered a full-stack **Flask** back-end processing **100k+** datapoints from 20+ device sources, designing relational database schemas into one maintainable data model.
- Implemented asynchronous batch processing and storage workflows in **GCP**, raising execution speed **35%** and cutting redundant database write operations **60%**.
- Automated environment setup and data seeding via Bash scripts, and authored specs and documentation standards that cut onboarding and testing time up to **80%**.

RESEARCH

Applications of Multi-Agent Systems
Undergraduate Research Fellow (UC Scholars)

San Diego, CA
June 2025 – Aug. 2025

Multi-Agent AI Tutor | *Python, React, TypeScript, Django, MCP*

- Shipped a full-stack agentic tutor with a **React (TypeScript)** front-end and **Django (Python)** back-end, cutting LLM hallucinations **80%** through iterative development.
- Engineered custom **MCP** servers standardizing tool access across agents and **7 REST APIs**, delivering production prototypes validated by **15+** chess players and coaches.
- Accelerated system runtime **83%** through agent orchestration and code reviews, presenting the published work at the **UCSD Summer Research Conference (SRP)**.

PROJECTS

SquaredUpChess | *React, TypeScript, Django, Node.js, AWS, Docker* 

Aug. 2025 – Dec. 2025

- Shipped a full-stack web platform on **AWS** with a **React (TypeScript)** front-end and **20+ Django REST APIs** for scheduling, real-time tracking, and payments.
- Established a **CI/CD pipeline** spanning design, automated testing, and deployment with strategic **SQLite** indexing and error logging to sustain **99.9%** reliability.

MovieRecapinator | *Java, Spring Boot, Maven, JavaScript, IMDb API* 

April 2025

- Developed a recommendation engine in **Java** with **Spring Boot** and **Maven**, processing **700,000+** IMDb API entries to rank high-priority episodes for series recaps.
- Collaborated with a 4-person team at **DataHacks** to build the full-stack system, delivering a functional **JavaScript MVP** through execution within a **24-hour** sprint.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, Java, SQL (PostgreSQL/SQLite), Bash, HTML/CSS

Development: React, Node.js, Django, Spring Boot, Flask, FastAPI, REST APIs, Git, JUnit, PyTest

AI & Cloud: AWS, GCP, Docker, GitHub Actions, PyTorch, LLMs, Gemini/OpenAI API, MCP, Linux
